As a junior software developer, I am driven by enthusiasm and self-motivation to tackle challenges with creativity and precision. With a flexible mindset, I adapt swiftly to evolving project requirements and collaborate effectively in dynamic team environments. Eager to apply my skills in Java, Spring, SQL, HTML/CSS, JavaScript, Angular, and Agile methodologies to contribute to innovative software solutions.

EDUCATION

Java full-stack software developer course PROGmasters

07/2023 - 02/2024

About the course

- Gained comprehensive training in both frontend and backend technologies.
- Acquired proficiency in Java programming, Spring framework, Angular, SQL databases, and web development fundamentals through hands-on projects and practical exercises.
